AEROFLYTE

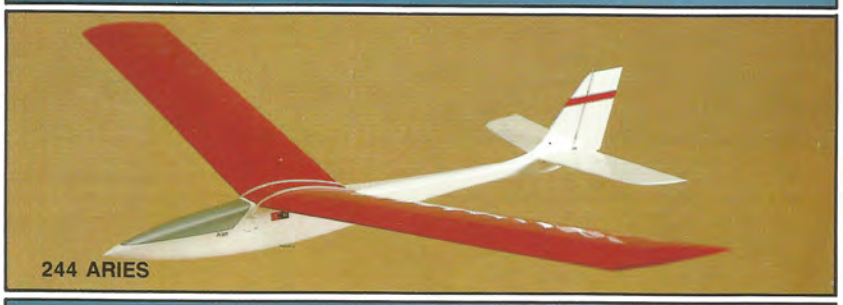
Australia's Largest Model Kit Manufacturer!

R/C SAILPLANES

167 CAPELLA 1500mm span polyhedral wing, 2 channel R/C sailplane. Simple robust construction ideal for beginners.

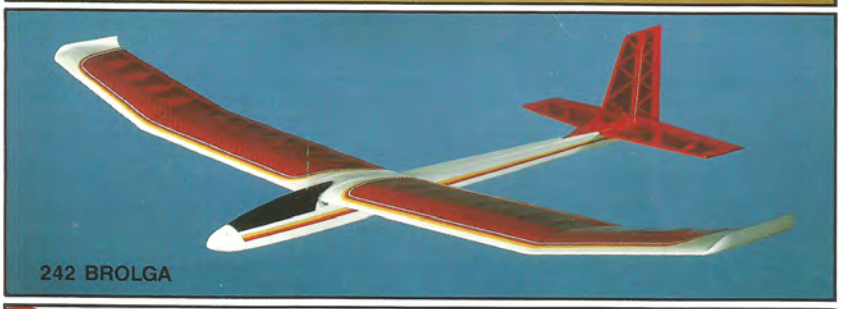
167 CAPELLA

244 ARIES 1600mm span 2 channel R/C sailplane. Stable easy to fly and reacts quickly to lift. Can be flown by towline, slope soaring or by small engine such as Cox .049. Optional power pod is included.



244 ARIES

242 BROLGA 2000mm span 2 channel R/C thermal sailplane. Designed for smooth gentle performance for the beginner or sports flyer, but able to mix it with the best in the hands of a competition flyer. Optional engine powered version details included, plus components to build a heavy duty version wing, suitable for winch launch.



242 BROLGA

245 ALBATROSS 2500 mm span 2 channel R/C thermal sailplane. Albatross is an ideal model for learning to fly radio control and great for the sports flyer. Designed as a "floater" it is very easy to fly, stable, reacts quickly to lift and turns flat and tight to stay in those thermals. Albatross can be flown by towline, bungie or as a slope soarer. Albatross has been produced for easy building and contains accurate diecut balsa and ply parts.

245 ALBATROSS

R/C POWERED AIRCRAFT

165 NOVA 1160mm span 3 channel .15ci (2.5cc) engine R/C sports kit. Parasol wing, stable flying characteristics and good looks make it an excellent choice for sports flyers. Can be flown as 2 channel model with fixed engine speed.

165 NOVA

128 15 TRAINER 1180mm span 3 channel .15ci (2.5cc) engine R/C model. An ideal first radio control aircraft with stable flying characteristics. Structually strong, designed for easy building with foam core wings, easy to take off, fly and land.

128 15 TRAINER

AEROFLYTE

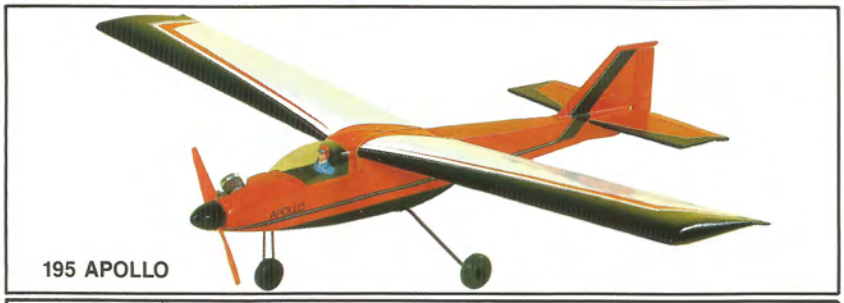
125 JUPITER 1200mm span 3 channel .20 - .25ci (3.5 - 4cc) engine R/C model. Rapid assembly and foam core wings, with excellent flying behaviour are characteristics of Jupiter.

125 JUPITER

240 TELSTAR 1180mm span 3 channel .20 - .25ci (3.5 - 4cc) engine R/C model. Ideal for the novice or sport flyer. The steerable tail wheel provides good field manoeuvrability. Foam core wing components, die cut parts make Telstar quick and easy to build.

240 TELSTAR

195 APOLLO 1510mm span 3 channel .40 - .45ci (6.5 - 7.5cc) engine R/C model. Rugged rapid construction and top performance, wide track under carriage, suits novice to sports flyer. Optional aileron wing kit AF199 is available.



195 APOLLO

A full range of Aeroflyte kits, balsa-wood, fuels, dope, cements, wheels and accessories are available from most hobby dealers.

Aeroflyte policy is to continually design and manufacture new product. New releases may be available in your hobby store which are not shown in this publication.

124 HUSTER 1500mm span 3 channel .40ci (6.5cc) engine R/C model. This model is known throughout Australia as a top performance trainer/sports model. Optional aileron wing kit AF180 is available.

124 HUSTLER

246 GEMINI MK II 1430mm span 4 channel .40ci (6.5cc) four stroke or 35 - 40ci (6 - 6.5cc) two stroke engine R/C model. Features simple foam core wing construction and suitable for the very popular OS40ci four stroke engine for quiet relaxed flying. For high performance we suggest 35 - 40ci size two stroke engines.

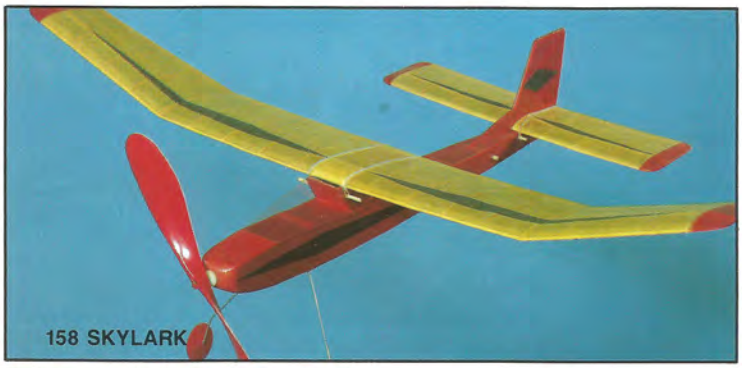
246 GEMINI MK II

AEROFLYTE

Aeroflyte radio control kits contain accurate die cut balsa and ply parts and come complete with all accessories. Require only power plant, covering material, dope, paint and some adhesives.

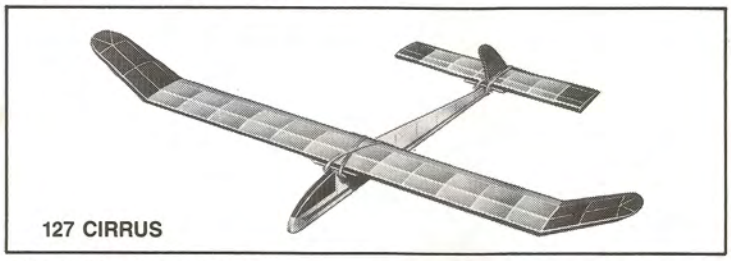
Aeroflyte sailplanes contain accurate die cut balsa and ply parts and come complete with all materials to build and fly. May require only paint and some adhesives.

158 SKYLARK 915mm span high wing rubber powered duration model.



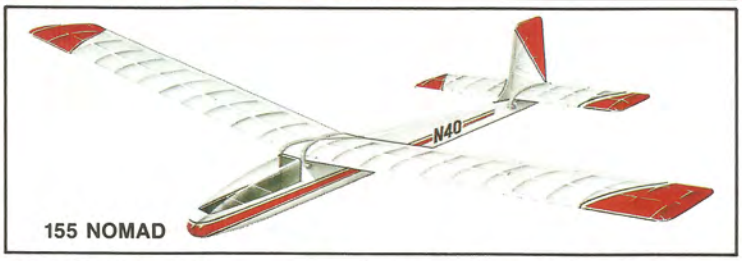
158 SKYLARK

FREE FLIGHT SAILPLANES



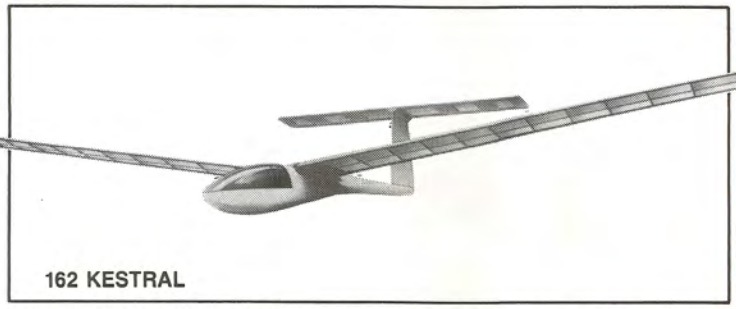
127 CIRRUS

127 CIRRUS 1100mm span high lift wing endurance sailplane. Recommended as a second model.



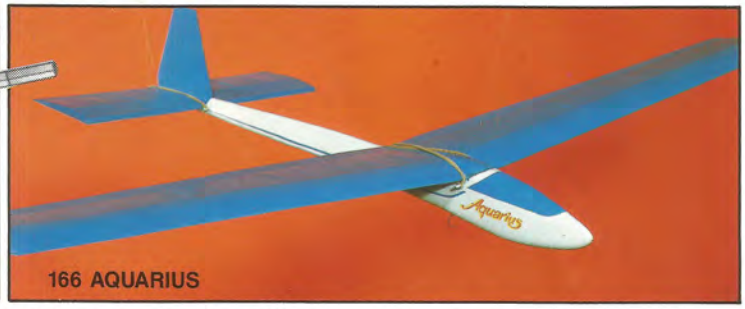
155 NOMAD

155 NOMAD 1100mm span sailplane with acetate canopy. Ideal as beginners model.



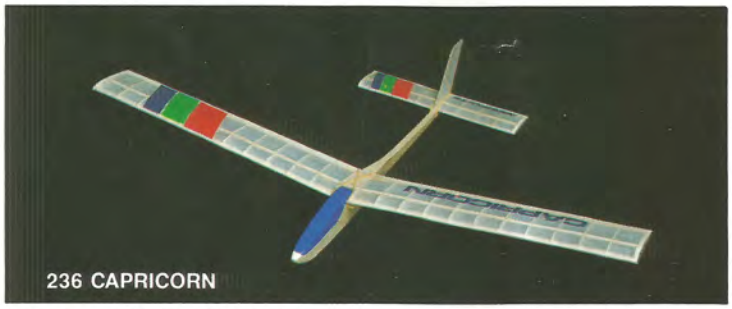
162 KESTRAL

162 KESTRAL 1500mm span advanced sailplane. Recommended as a second model.



166 AQUARIUS

166 AQUARIUS 1500mm span advanced sailplane. Recommended as a second model.



236 CAPRICORN

236 CAPRICORN 1100mm span performance sailplane. Ideal as beginners model.

238 AQUILA

238 AQUILA 1480mm span performance sailplane with acetate canopy. Recommended as a second model.

FUEL POWERED BOAT

190 PLATYPUS

190 PLATYPUS 450 mm long, .049ci engine powered free running air boat kit. Strong construction for heavy duty work. Kit includes full details for optional 2 channel radio controlled version using a .10ci R/C engine.

CONTROLINE PLANES

101 EAGLE

101 EAGLE 750mm span .15ci (2.5cc) engine controline trainer. The best controline trainer available in Australia. Robust construction, excellent flying characteristics, easy to take off and land. Detailed plans and instructions make building fast and simple.

AEROFLYTE

CONTROLINE PLANES

102 COUGAR 450mm span .10ci (1.5cc) engine controline trainer. Simple solid wing, robust construction and easy to fly.
