200 Laser Cut Series

Kit 203
Nieuport

Guillow's legendary WWI series all have **precision laser cut** balsa parts that make it a snap to assemble these historic aircraft. Each kit contains plans and instruction sheets that have set the standard in the industry for over 85 years, realistic looking water release decals, lightweight wheels, detailed plastic parts that consist of a radial engine, access panels, machine gun and pilot figure.

Each kit is packed with ample covering tissue, balancing clay, an assembled propeller and rubber thread.

These kits are the last word in scale realism for both the detail enthusiast and for those who build to fly scale WWI models.

Kit 703 LC
Edge 540

Build by number models, great for first time builders - ideal for individual use or for group model building such as in a school class. Now with **precision laser cut** parts for easier assembly, and precise builds. The Fairchild 24 and Arrow are built light to fly right and make great models to take to the local fields, the Edge 540 contains bright red tissue covering and fun decals. Just like the real air show stunt planes at todays shows.

1200 Laser Cut Series

Kit 1202
1903 Wright Flier

On December 17, 1903 Orville and Wilbur Wright flew into history. Orville Wright made the first sustained, controlled powered flight of a heavier than air aircraft. The 1903 Wright Flier was flown 120 feet in 12 seconds by Orville Wright. That same day Wilbur Wright flew the plane 852 feet.

This 1:20 scale build n’ show display model of the 1903 Wright Flier has been designed for easy assembly using Guillow’s famous step by step building methods. Kit includes grade A **precision laser cut** balsa parts, high quality tissue covering, laser cut profile of pilot, simulated engine, movable propellers and a display stand with plaque.

1400 Series

Kit 1401
F-15 Eagle

Popular jets available as balsa and tissue models, these unique scale construction kits offer an interesting alternative to the wide range of plastic models offered hobby fans. Built as “skeleton” models (as shown) they make impressive display pieces. Tissue covered and decorated with decal insignia, each model is an eye catching replica of its namesake. The results are certain to please both the beginner & advanced model builder.
