## 200 Laser Cut Series

Kit 203  
Nieuport II

Guillow's legendary WWI series all have precision laser cut balsa parts that make it a snap to assemble these historic aircraft. Each kit contains plans and instruction sheets that have set the standard in the industry for over 85 years, realistic looking water release decals, lightweight wheels, detailed plastic parts that consist of a radial engine, access panels, machine gun and pilot figure.

Each kit is packed with ample covering tissue, balancing clay, an assembled propeller and rubber thread.

These kits are the last word in scale realism for both the detail enthusiast and for those who build to fly scale WWI models.

## 300 Laser Cut Series

Kit 305 LC  
DHC-2 Beaver

The popular private planes in the 300 series now have precision laser cut parts. Laser cut parts are much easier to build from and make a more precise model than die cut. Guillow has been working hard to re-draw and convert our existing kits over to this newer technology.

## 600 Series

Kit 602  
Piper Super Cub 95

Easy, build by number plans are included in this series. Ideal for individual use or for group model building such as in a school class. Each kit contains the right combination of building materials and "power package" to assemble an attractive model with good flying ability.

## 700 Laser Cut Series

Kit 703 LC  
Edge 540

Build by number models, great for first time builders - ideal for individual use or for group model building such as in a school class. Now with precision laser cut parts for easier assembly, and precise builds. The Fairchild 24 and Arrow are built light to fly right and make great models to take to the local fields. The Edge 540 contains bright red tissue covering and fun decals. Just like the real air show stunt planes at todays shows.

## 1200 Laser Cut Series

Kit 1202  
1903 Wright Flyer

On December 17, 1903 Orville and Wilbur Wright flew into history. Orville Wright made the first sustained, controlled powered flight of a heavier than air aircraft. The 1903 Wright Flyer was flown 120 feet in 12 seconds by Orville Wright. That same day Wilbur Wright flew the plane 852 feet.

This 1:20 scale build n' show display model of the 1903 Wright Flyer has been designed for easy assembly using Guillow's famous step by step building methods. Kit includes grade A precision laser cut balsa parts, high quality tissue covering, laser cut profile of pilot, simulated engine, movable propellers and a display stand with plaque.

### 1202 1903 Wright Flyer

24.2" wing span (61.47 cm) - Scale: 1/20th - Build Time: 30+ hours

# 1400 Series

Kit 1401  
F-15 Eagle

Popular jets available as balsa and tissue models, these unique scale construction kits offer an interesting alternative to the wide range of plastic models available to hobby fans. Built as "skeleton" models (as shown) they make impressive display pieces. Tissue covered and decorated with decal insignia, each model is an eye catching replica of its namesake. The results are certain to please both the beginner & advanced model airplane builder.
