# Features

## FOUND IN LINDBERG MODELS THAT MAKE THEM THE FINEST

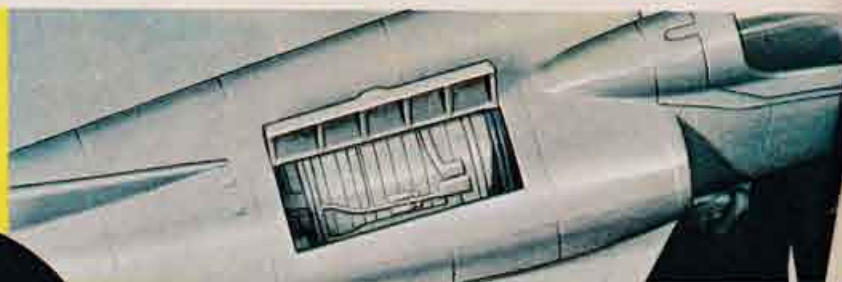

**OPERATING GEAR ASSEMBLY** in powered models are precision engineered, to give proper motion to all moving parts. A LINDBERG feature for authenticity.

**RETRACTABLE LANDING GEARS** are another LINDBERG achievement in plastic designing. Never before has such intricacies, that are simple to construct, been offered the model builder.

The opened **HINGED CANOPY** reveals the interior of the cockpit and pilot. The designing of the hinged canopy is another fine point in detailing to add realism.

The **INSPECTION HATCHES** give access to the inside of the fuselage. When opened they disclose the precisely engraved jet engines and after burners. A plus feature to add that "true to life" feeling in LINDBERG models.

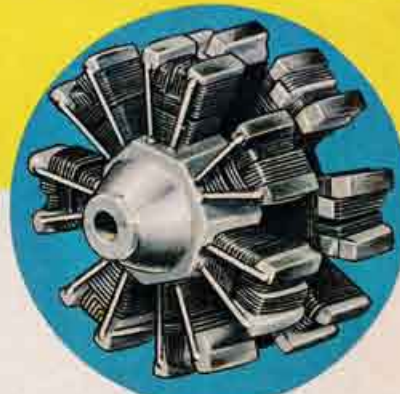

**JET ENGINES AND AFTER BURNERS** are precise, exacting reproduction models of the power plant in our planes of today. With LINDBERG models designing does not stop with the exterior, but follows thru to the interior.

**MOVABLE CONTROLS** incorporated into the models, can be moved to various positions to portray direction of flight.

**HIGHLY DETAILED ENGRAVED FIGURES** included in Lindberg kits are the finest obtainable. Even under a magnifying glass the exactness of these tiny figures is incredible. The figures give a true visual comparison of size for model, because they are all in scale. The costume of each figure is authentic, setting the time and locale when model was in use.

**SCALE ENGINES** included in kits are so exacting in appearance they give the impression of being a working engine. All engines are scaled from power plant of the plane in which they were incorporated. Above are but two examples: left, OX-5 engine in Jenny; right Twin Row 14 cyl engine in the Avenger.

**ADJUSTABLE DISPLAY STAND**, modern in design, gives the feel of motion. This stand is adjustable to many positions and is "fool-proof"; it will not slip or break. The stand is free with all models.

**GROUND EQUIPMENT** as shown to the left are additional features found in many LINDBERG kits. The model when completed and set up with these additional accessories, can depict various ground situations, adding greatly to the educational value.

**ELECTRIC MOTOR** included in all motorized boat kits is a real plus feature. Not only are models authentic in every detail, but now there is automatic motion to all moving parts.

**MOTORIZED BOATS WILL OPERATE IN WATER**

# MINIATURE MODELS

A GROUP OF REAL TINY ONES, 1 7/8" to 3 3/8" long. The detail is fantastic for such a small scale; clear canopies, rolling wheels, colorful decals, and fine engraving of all plastic parts. If space is at a premium, here is a collection that can be displayed on eighteen inches of narrow shelf space.

# POPULAR JETLINERS OF THE WORLD

**U.S. JETLINER BOEING 707**  
 7½" wing-span, 7¼" long. The Boeing 707 was America's first commercial jet transport. Powered by four Pratt & Whitney turbojet engines, rated at 10,000 lbs. thrust each, the 707 has a cruising speed around 590 mph.

Kit No. 451

49¢

**U.S. JETLINER CONVAIR 880**  
 7½" wing-span, 7¾" long. This four-engine, medium-range transport is considered one of the world's fastest commercial jet airliners. Powered by four G.E. turbojet engines of 10,000 lbs. thrust each, the 880 has a maximum cruising speed of 615 mph.

Kit No. 452

49¢

**U.S. JETLINER DOUGLAS DC-8**  
 7¾" wing-span, 7¾" long. This swept-wing jetliner by Douglas is one of the largest commercial transports built. The DC-8 is capable of carrying up to 176 passengers at a cruising speed of around 600 mph.

Kit No. 453

49¢

**FRENCH JETLINER CARAVELLE**  
 7½" wing-span, 7¼" long. The Caravelle is the first medium-range, twin-jet airliner of France. Powered by two Rolls-Royce Avon turbojet engines mounted on the rear for the fuselage, this aircraft is capable of carrying 90 passengers at a cruising speed of 480 mph.

Kit No. 454

49¢

**BRITISH JETLINER COMET**  
 7¾" wing-span, 7½" long. Powered by four 10,500 lb. thrust Rolls-Royce Avon turbojet engines, buried in its wing roots, this new de Havilland Comet IV will carry up to 76 passengers at a cruising speed of over 500 mph.

Kit No. 455

49¢

**RUSSIAN JETLINER TU-104**  
 7¾" wing-span, 8¼" long. One of the first Russian-built jet transports, the TU-104 carries up to 46 passengers at a cruising speed of around 500 mph. Thick, 30 deg. swept wing gives it quick take-off and short landing characteristics.

Kit No. 456

# SPECTACULAR MILITARY... COMMERCIAL PLANES

**F-80C SHOOTING STAR-JET FIGHTER**  
10" wing-span, 8 $\frac{3}{4}$ " long. An exciting model to build. Molded of metallic silver. Wing tanks, clear canopy, landing gear, pilot and pilot seat, add beauty to this slick Jet Fighter.  
Kit No. 500

98¢

**F-86 SABRE-JET FIGHTER**  
9 $\frac{3}{8}$ " wing-span, 9" long. The Sabre kit includes realistic clear canopy, pilot and pilot seat, wing tanks, rockets and colorful decals. Molded in metallic silver. Used widely during the Korean Conflict.  
Kit No. 505

98¢

**P-47N THUNDERBOLT**  
10 $\frac{1}{4}$ " wing-span, 8 $\frac{3}{4}$ " long. Molded of metallic silver plastic. Includes plenty of detail and extras, such as—bombs, rockets, guns, display stand, clear canopy and decals.  
Kit No. 511

98¢

**REPUBLIC F-91 THUNDERCEPTOR**  
8" wing-span, 13 $\frac{1}{2}$ " long. This substantial looking jet fighter is in the high speed class, used by the U.S. Air Force. An excellent looking model with detailed wing tanks, landing gears and colorful decals.  
Kit No. 513

98¢

**FJ-2 FURY-JET FIGHTER**  
9 $\frac{3}{8}$ " wing-span, 9" long. This jet fighter is molded in blue with details such as rockets, wing tanks, pilot and pilot seat, two piece clear canopy, decals.  
Kit No. 516

98¢

**F-86D SABRE-JET FIGHTER**  
9 $\frac{1}{2}$ " wing-span, 10 $\frac{1}{4}$ " long. This jet fighter is molded in gleaming metallic silver. Model comes complete with rockets, rocket ejector under fuselage, colorful decals, landing gear, clear canopy.  
Kit No. 522

98¢

.....CREATING THE THRILL OF ADVENTURE

#### CONVAIR XFV-1 VERTICAL TAKE OFF FIGHTER

7 1/8" wing-span, 8 5/16" long. Model comes equipped with contrarotating propellers powered with a plastic drive encased in spinner. Many features such as pilot and pilot seat, clear canopy, landing wheels with movable struts and colorful decals. Molded in gleaming metallic silver.  
Kit No. 526

98¢

#### X-3 STILETO

5 3/4" wing-span, 16 3/4" long. The Douglas X-3 Stiletto is a hypersonic jet plane, acclaimed to exceed speeds of 2,000 miles an hour. This needle nose jet is complete in every detail, with two jet engines and swivel display stand.  
Kit No. 530

98¢

#### DOUGLAS F4D-1

9" wing-span, 12" long. The Douglas F4D-1 Skyray was one of the first revolutionary new carrier-based aircraft used by the U.S. Navy. The prototype set up a World Speed Record of 753.4 mph over a 3-km. course in October 1953. Engine is a 9,700 lb. thrust Pratt and Whitney J57 Turbojet.  
Kit No. 562

98¢

## PLANES OF WORLD WAR ONE AND TWO

#### PT-17 TRAINER

8 7/8" wing-span, 5 7/8" long. Used as a primary trainer by the Army and Navy during World War II. It has now been retired to occasional crop dusting duties. Kit is molded in yellow plastic.  
Kit No. 508

98¢

#### CURTISS JN4D JENNY

10 3/16" wing-span, 6 3/4" long. This historical airplane (Jenny) was most widely used as a training plane during World War I. Its detail is superb—it includes two crew members, a mechanic with dolly.  
Kit No. 534

98¢

#### WORLD WAR II FIGHTER BOMBER

10 3/4" wing-span, 8 1/2" long. This plane was used in almost all active war theatres during World War II. A very popular propeller model with beautiful detailing, clear canopy, pilot, rockets, bombs, and full set of decals.  
Kit No. 550

98¢

#### GRUMMAN F-6-F HELLCAT

10 1/4" wing-span, 8" long. Highly detailed in blue plastic, with many plus features such as clear canopy, bombs, wing tanks, pilot, pilot seat and decals.  
Kit No. 515

98¢

## THEY ARE JUST LIKE THE REAL ONES

**JAPANESE ZERO**—10" wing span, 7½" long. A touch of the propeller gives this model exciting realism. Featuring the famous LINDBERG kit motor. Molded in gleaming metallic silver, with clear canopy, pilot and pilot seat plus decals. Kit No. 304M \$1.00

**B-58 HUSTLER**  
8" wing-span, 14" long. The "HUSTLER" is the first multi-jet delta bomber in the world capable of super sonic speed in level flight for any length of time. The model is molded in silver plastic. Kit includes decals, display stand, and complete crew. Kit No. 560 98¢

**TWIN JET NAVY FIGHTER**  
9½" wing-span, 12" long. This model is molded in blue with exacting details, rivet markings, scaled pilot and pilot seat, colorful decals, etc. This model is one of the top in the plastic field. Kit No. 556 98¢

**KOREAN WAR SUPERSONIC JET FIGHTER**  
9¾" wing-span, 9" long. Model has clear canopy, pilot, pilot seat, wing tanks, rockets and colorful decals. Molded in metallic silver. Kit No. 557 98¢

**NAVY CRUSADER F8U-1**  
9¼" wing-span, 13" long. It is in the 1,000 mph speed class and operates from aircraft carriers. Our model has an operating ejector seat and jet pilot, retractable landing gear, jet engine and afterburner, plus movable controls. Kit No. 548 98¢

**B-70 BOMBER**  
8" wing-span, 12½" long. Designed to range intercontinental distances without refueling, will cruise at 2,000 mph, three times the speed of sound and faster than the earth's rotation. A plane that bridges the gap between today's aircraft and tomorrow's space ships. Kit No. 567 98¢

**STUKA GERMAN DIVE BOMBER**—11½" long, 8¾" wing span, ¼" = 1" scale. Molded in green and clear plastic. Kit motor included that spins propeller giving additional life-like authenticity to a highly detailed model. The Stuka is a famous German World War II dive bomber and fighter. Kit No. 306M \$1.00

**DECALS FOR COLORFUL DETAIL IN EVERY KIT**

## U.S.A. FLIGHT DEMONSTRATORS

### BLUE ANGELS JET

8" wing-span, 12" long. This jet is flown by the famous "Blue Angels" Naval Flight Demonstration Team. As a colorful hobby kit it is molded in blue plastic with beautiful yellow decals. Also Jet engine with afterburner and movable controls.

Kit No. 541

98¢

### AIR FORCE "THUNDERBIRDS"

9 1/8" wing-span, 13 3/4" long. Colorful U. S. Air Force aerobatic team jet. This model features jet pilot, seat, movable controls, jet engine, afterburner, clear canopy and authentic decals. A must for every model hobbyist.

Kit No. 552

98¢

## EUROPEAN FIGHTERS

### RUSSIAN JET FIGHTER

8 3/4" wing-span, 9 3/8" long. This swept wing, single seat, twin jet fighter is a fast and heavily armed aircraft. Designed as an all weather interceptor and high altitude fighter, it can reach supersonic speeds. It is armed with four 30 mm cannons.

Kit No. 561

98¢

**BRITISH JET FIGHTER HAWKER HUNTER**  
8 1/2" wing-span, 11 1/4" long. Packed with fine features, pilot and pilot seat eject from cockpit. The tail section is removable, permitting the jet engine and after burner to be removed. Control surfaces move and landing gear retracts. Plus decals of various nations that use this plane. Also tractor and driver.

Kit No. 536

98¢

### BRITISH CARRIER FIGHTER

10 1/4" wing-span, 8" long. An American plane that served the Royal Navy in World War II. Molded in beautiful blue plastic with scaled pilot and pilot seat, clear canopy, bombs, belly tank and a full set of colorful decals.

Kit No. 558

98¢

### BLACK ARROW JET

9" wing-span, 11 3/4" long. The Hawker Hunter was used by the Black Arrow flight demonstration team to thrill millions of people with exacting low-level formation flying. Treble One was formed to demonstrate precision flying techniques of the R.A.F.

Kit No. 564

98¢

## EUROPEAN COMBAT MODELS

### NATO JET FIGHTER

8" wing-span, 13" long. Powered by a General Electric J79 Turbojet engine with afterburner, the F-104 is able to climb as fast as it can fly in level flight and is often referred to as the missile with a man in it. Speed 1500 mph. Kit No. 559

98¢

**GERMAN JUNKERS JU-88**

98¢

**GERMAN JET FIGHTER ME-262**  
10¾" wing-span, 8¾" long. Highly detailed features such as movable controls, twin jet en-gines, retractable landing gear and inspection hatches, pilot and mechanic plus decals. Kit No. 538

98¢

**SWEDISH JET DRAGON SAAB**  
12¾" long, 7¼" wing span. Molded in white and clear plastic. Retractable landing gear, eight wing mounted missiles and belly rockets that actually fire. Press trigger to release firing mechanism of belly rockets. Complete set of decals and pilot also included. KIT No. 570

98¢

## PLANES OF HISTORY

**SPIRIT OF ST. LOUIS**  
11½" wing-span, 7¼" long. This famous his-torical plane made the first solo non-stop flight across the Atlantic Ocean. Beautifully detailed, pilot and pilot seat, clear plastic windows, ac-curate radial engine, decals. Kit No. 520

98¢

### WINNIE MAE

10¼" wing-span, 6¾" long. This famous air-craft is now on exhibition in the Smithsonian Museum in Washington, D.C. It is molded in white plastic and a complete set of decals are supplied for every decoration of this colorful model. It has movable control surfaces. Kit No. 533

98¢

.....WORKMANSHIP.....SELECTION.....VALUE

**CONTINENTAL FUTURE SUPER SONIC AIRLINER SST**—The airliner of the future will travel at speeds of Mach 3 (2000 miles per hour) and land at present day airports. The SST—Super Sonic Transport—will reach a cruising altitude of 70,000 feet twenty minutes after takeoff. At altitudes under 35,000 feet it will fly at 600 miles per hour to hold down ground noises. Present rate of progress in SST research and development could make a passenger version operational by 1970.

Kit No. 569

98c

#### GRUMMAN F 11 F-1 TIGER

8" wing-span, 12½" long. This famous super-sonic Navy Jet is another in the LINDBERG series of famously designed, detailed models. Molded in gleaming white plastic. It has a simulated jet engine with after-burner, also movable controls and an inspection hatch.

Kit No. 531

98c

#### F-100 SUPER SABRE

9½" wing-span, 13¾" long. The Air Force new F-100 Super Sabre capable of speeds over 800 mph. This model has a jet engine and after burner, movable controls and new modernistic swivel display stand.

Kit No. 528

98c

#### DOUGLAS SKYRAY F-4D-1

8¼" wing-span, 11" long. Molded in gleaming white plastic, this beautiful 753 mph Jet fighter is now used as a Navy carrier plane. Complete with wing tanks, rockets, landing gears, pilot and seat, full color decals.

Kit No. 523

98c

#### F-88 VOO DOO JET FIGHTER

11½" wing-span, 15½" long. This jet aircraft is one of the latest fighters of the U.S. Air Force. As a model, details are wing tanks, nose spear, clear canopy, movable controls, complete landing gear parts and pilot.

Kit No. 543

98c

#### NAVY LIGHT ATTACK BOMBER & TRACTOR

6¾" wing-span, 9¾" long. Molded in gleaming white plastic, model has movable controls, cockpit canopy that opens, jet engine, pilot, pilot seat, bomb and rockets, ground crew man and tractor, plus a full set of decals.

Kit No. 555

98c

#### CONVAIR STRATEGIC AIR COMMAND BOMBER

# Lindberg's NEW EXCITING READY TO RUN "HO" LINE...

All cars are scaled from manufacturer's blue prints and specifications. Molded in high strength plastic for the most durability. These exacting detailed cars are painted in flat railroad colors, with correct road names and heralds. The automatic couplers are molded of Delrin® with metal springs. Each car is packaged in a clear plastic box that is designed to be used as a stack tray for storing car, other HO equipment; and there are scaled to size figures with each car.

## LINDBERG FREIGHT CAR TRUCKS ARE THE BEST

Needle point precision steel axles ride in self lubricating DuPont Delrin® bearings, giving free action to the wheels. The minutely detailed precision engineered Delrin® trucks are non-shorting with bolsters that cannot bind. Tempered steel springs of correct strength provide proper floating action to a freight car, plus less derailing. Don't throw away the clear plastic box that trucks are packed in. It is great for storing those small HO parts.

#### A MESSAGE FROM OUR PRESIDENT

For nearly thirty years my life has been devoted to the model industry. It is very satisfying to see the tremendous growth which has developed in this field. In all of these years we, at Lindberg Products, have had but one goal, to create the most exacting models in easy-to-assemble kits. It is our desire to maintain this high quality in all of our future releases. The models which go into production are chosen carefully in an attempt to provide educational value and also develop a coordination of mind and hands. Regardless of what the model may be, we attempt to incorporate the most advanced ideas to create for the modeler the realm of reality.
