ENGINE: .20 - .25 - .40
RADIO: 4 channel

PIPER TOMAHAWK

The TOMAHAWK is Piper's finest addition to this line of biplane planes and it's a two-seater that is built for student teacher instruction. Because of that the plane has a lot of appeal for the modeler. Also has been manufactured in a 25% scale. Now you can enjoy it in your own home!

The kit features the only 40% built-up kit design, vacuum formed tray and big sections formed clear canopy which all add up to make it a simple mounting project that is close to work. You get the usual "formed leading edge" material but use instructions completely with a photographic building guide and radio installation instructions. All small hardware is included. The model will fly like a real plane. So imagine what you can do with a 40% scale engine because this is a big model!

Q.B. 15H

IT'S A 'Snap' TO BUILD

SPAN: 49.5 in.
AREA: 409 sq.in.
ENGINE: .15
RADIO: 2 - 3 channel

The QB 15H has become our most popular 15 engine size sport trainer or Sunday flyer model. The reason for this is simple, it is a model which looks great, is priced right, is unusually easy and fast to build, and it flies like a dream. The QB 15H features; clear front and side windscreens, glass filled nylon motor mount, steerable nose gear, hand machined and die cut balsa and plywood parts that are numbered for easy assembly, full size plans and most hardware. The wing leading edges are notched and machine shaped. These and lots of other extras make this our most popular training model.
